

Playback controls for Echo360. Public links do not have tags 2-8.

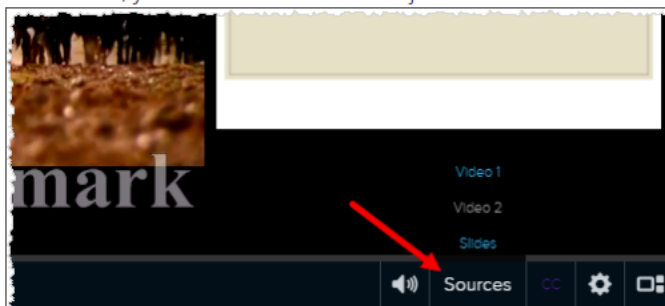

The following tools are available to you, identified by number in the figure above to correspond with the descriptions in the table below.

TAG #	PURPOSE/FUNCTIONALITY
9	Playback Controls: these include the standard play/pause button, fast forward, and rewind (each click moves the playback 10 seconds in either direction; click and hold to scrub through playback). You can also click on a location in the playback bar to move the playback to that location.
10	The video timestamp located to the right of the Playback controls shows the total length of the capture/video, the current location in playback, and the currently showing slide if applicable.

Source
View
Control

Use the **Sources** button to enable/disable items in the classroom. If the classroom has multiple visual feeds, you can select to view all or just one or two of them at any given time.

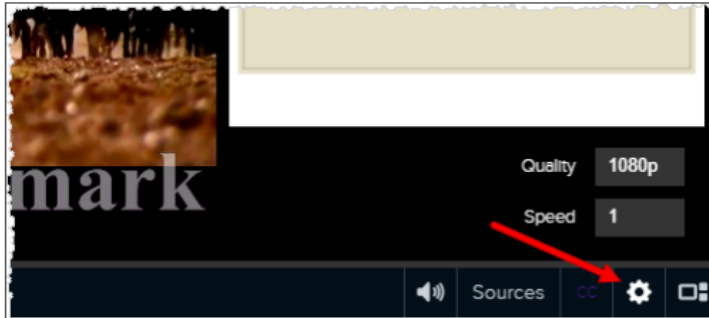

You must also use the Sources button to **re-enable any visual feed** you closed using the X icon in the top right corner of the media's panel.

In the above example, the classroom is only showing the Video 1 and Slides. Video 2 has been closed, as indicated by the gray text in the sources list.

To return Video 2 to the classroom, click on it from the source list.

Playback
Quality
and
Speed

The **Settings button** provides playback quality and speed controls. Most video media is processed for both low-bandwidth and high-bandwidth playback. If your network connection is a problem, you can switch to lower quality playback (or switch back to high definition if applicable).

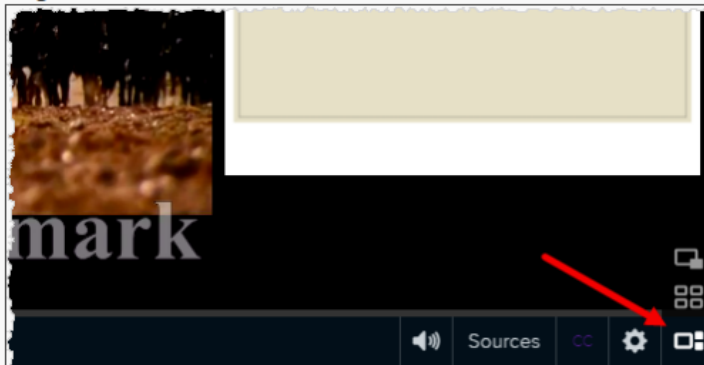

In addition, you can view the classroom at up to 2x speed or as low as .5 speed, at .25 intervals as needed.

Click in the **Quality and Speed boxes** to see and select the options available.

Media
Layout

The **media layout button** allows you to change how the media items are displayed, viewing a single feed maximized with others in thumbnail, or with all items at equal size.

Click through each option to see which **layout works best for you**. Keep in mind you can also use the **Sources button** to change which media feeds are being shown or hidden.

Full
Screen

The maximize or "**full screen**" icon appears in the top right corner of each media panel in the classroom. It allows you to view that media feed in full screen mode.

Press the **ESC key** to exit out of full screen mode.
