Residency in Small Animal Emergency & Critical Care: Program Specifics

Please see “House Officer Programs: General Information” for basic information common to all internship and residency programs. The following information highlights specific program requirements of the Small Animal Emergency & Critical Care residency program.

Program Director: Dr. April Blong (aeb287@iastate.edu; 515-294-1500)
Faculty Diplomates serving as supervisors and potential advisers of the program:
- Rebecca Walton, DVM, DACVECC
- April Blong, DVM, DACVECC
- Katie Cooley, DVM
- Julie Riha, DVM
- Note: Diplomate status is required for faculty to serve as a resident adviser.

Specialty College: American College of Veterinary Emergency and Critical Care
- Residents must follow requirements for candidate registration, certification, and examination of the ACVS as outlined online (www.acvecc.org).
- The resident must register with the specialty college no later than August 1st of the year their residency starts (http://acvecc.org/blog/residency-forms/).
- Weeks of service and seminars must be logged as per ACVECC guidelines via the Residency Training Database by September 1st of each year of the program (http://rtp.acvecc.org).
- The resident must complete ACVECC training benchmarks for review by their advisor by December 20th and June 20th of each year of the program.
- The resident must make applications for sitting the ACVECC certifying examination. The credentials application and fee is due around January 15 of the year the exam is to be taken. Final fee remittance for accepted applicants is due around May 1. Exact dates should be verified with ACVECC (http://acvecc.org/blog/residency-forms/).

- **ECC Service rounds** are composed of weekly (50 wks/year) resident topic rounds. The topic of these rounds will rotate on a three year schedule in proportion to the expected representation on the ACVECC certifying exam. Categories include but are not limited to: cardiovascular, respiratory, renal/urinary, endocrine, gastrointestinal, hepatobiliary, neurology/special senses, reproductive, musculoskeletal, immunologic/hemolymphatics, integument, sepsis/SIRS/MODS, shock/ischemia/CPR, coagulation/transfusion medicine, acid-base/fluid, anesthesia/analgesia, nutrition and environmental and toxicities. Focus in each category will include physiology, pathophysiology, diagnostics, monitoring and interventions.

- During approximately 75% of the year, there will be a second weekly rounds session that rotates between: **ECC literature review, ECC journal club, ECC morbidity and mortality rounds, ventilator lab, and mock exam.**
  - ECC literature review will involve each service member being assigned one or more ACVECC required/recommended journals and presenting a brief summary of relevant literature from that source.
  - ECC journal club will be assigned to service members on a rotating basis. The presenter for that session will provide an in-depth review and critical evaluation of a single prominent ECC related journal article. They will also lead group discussion.
  - ECC morbidity and mortality rounds will be assigned to service members on a rotating basis. The presenter for that session will provide an in-depth case review/summary for a single complex or difficult case from the ICU. They will also perform a relevant literature search and present current literature regarding some aspect of the case and lead a group discussion relevant to the case.
  - Ventilator lab will involve all service members. Skills practiced/discussed will include ventilator set-up, waveform analysis, and trouble shooting. This may be hands-on dry lab, didactic, or case-based in nature.
  - Mock exam sessions will involve each service member preparing a small set of questions (typically 5-7 multiple choice) regarding a set of assigned topics from recent resident rounds content. Exam questions are expected to be high-quality and meet format and criteria requirements set forth by ACVECC for candidate-submitted certifying exam questions. A minimum of two references from the ACVECC approved knowledge base list (one if it is a question relating to a specific journal article) are required to support each question.
Scholarship and teaching requirements

- Teaching and presentation requirements
  - The residents will participate in the instruction of clinical students and Residents. In order to meet ACVECC requirements, the resident will participate in the instruction of skills laboratories for Residents and students (minimum of 2 hours per year).
  - The resident will present a minimum of 1 lecture per year in the Small Animal Emergency and Critical Care course and/or Intern rounds as assigned by the ECC faculty.
  - The resident will present 2 lectures per year in ECC resident topic rounds. This lecture will be on a single topic at a level appropriate for presentation fellow ACVECC residents and diplomats.
  - The resident will be the primary presenter during 2 ECC journal club rounds sessions and 2 ECC morbidity and mortality rounds sessions per year.
  - The resident will be responsible for preparing questions, as per ACVECC guidelines, on assigned topics for mock exam sessions.
  - The resident may attend a major professional meeting during the first year of their program with the advice and approval of his/her faculty advisor and the house officer committee. Unless presenting, the first year resident will not be able to attend the International Veterinary Emergency and Critical Care Symposium (IVECCS). Expenses will be paid by the resident. The meeting must be scheduled during a non-clinical block.

- Research timeline
  - At the beginning of the residency, the resident will be provided with an ongoing research project to take over (P1). The resident is expected to complete P1 and begin a second project (P2) to be passed on to an incoming 1st year resident.
  - By the end of the 1st year of residency, the resident is expected to familiarize themselves with (literature review) and finish data collection for P1.
  - The resident should analyze data and prepare a manuscript for P1 during the 2nd year of residency. A manuscript suitable for publication in an ACVECC approved journal should be submitted to the resident advisor by March 1 of the 2nd year of their program.
  - Upon completion of P1, the resident should design their own original and prospective research project (P2) to address a specific question or problem in the discipline.
  - The resident should write and submit a research grant proposal for P2 that may be used to seek funding for the project by the end of the 2nd year of residency.
  - The resident will then begin to collect data for P2 according to the experimental design. It is not expected that the candidate will finish this project, but rather pass it to an incoming first year resident for completion.
  - Research is to be conducted during off-clinic time unless research is a clinical trial which can be conducted while on clinics.

Other program specifics that differ from ISU-CVM “House Officer Programs: General Information”

- Any elective external rotations must be approved by the resident advisor 3 months prior to the scheduled elective time.
- As part of the quarterly review evaluation process, ECC residents will complete the following Self-Evaluation Form:
ECC Resident Self-Evaluation Form

The resident is to complete all areas (except faculty feedback sections) of this evaluation and submit it to their faculty advisor at least one week before their scheduled evaluation. At the evaluation, the Resident’s progress will be discussed and feedback given.

Clinical skills:
- Please describe areas of clinical case management in which you feel you excel:
- Please describe areas of clinical case management in which you feel you could improve; include goals/plans on how to improve these areas:
- Please describe ways in which the ECC faculty can help you to achieve these goals:
- Faculty feedback of ECC Resident’s clinical case management skills:
  (1 is poor or almost never, 3 is average, 5 is outstanding or almost always)
  - Ability to manage basic emergency cases 1 2 3 4 5
  - Ability to manage complex emergency cases 1 2 3 4 5
  - Ability to manage basic critical care cases 1 2 3 4 5
  - Ability to manage complex critical care cases 1 2 3 4 5
  - Does the Resident ask for faculty assistance when indicated 1 2 3 4 5
  - Resident’s attention to detail on case management 1 2 3 4 5
  - Does Resident demonstrate compassionate care for patients 1 2 3 4 5

- Comments:

Teaching/Communication skills:
- Please describe ways and/or situations in which you feel you excel at teaching students; rotating Interns:
- Please describe areas related to teaching students and rotating Interns in which you feel you could improve; include goals/plans on how to improve these areas:
- Please describe ways in which the ECC faculty can help you to achieve these goals:
- Faculty feedback regarding ECC Resident’s teaching of students and rotating Interns:
  - Please describe ways/situations in which you feel you excel at communicating with staff; RDVM’s; clients:
  - Please describe ways/situations in which you feel you could improve communicating with staff; RDVM’s; clients: (include goals/plans on how to improve these areas)
- Please describe ways in which the ECC faculty can help you achieve these goals:
- Faculty feedback of ECC Resident’s communication:
  - Ability of the Resident to conduct student topic rounds 1 2 3 4 5
  - Ability of the Resident to discuss case presentations w/ students 1 2 3 4 5
  - Willingness of the Resident to teach students 1 2 3 4 5
  - Resident’s interaction skills with technical staff 1 2 3 4 5
  - Owner communication 1 2 3 4 5
  - RDVM communication 1 2 3 4 5
  - Ability of the Resident to guide rotating Interns 1 2 3 4 5
o Ability of the Resident to teach rotating Interns when impromptu learning opportunities arise 1 2 3 4 5
o Ability of the Resident to give constructive criticism 1 2 3 4 5
o Ability of the Resident to receive constructive criticism 1 2 3 4 5
o Comments:

Research/presentation skills:
• Please list any presentations that you have prepared and given since the last evaluation:
• Please list any research activity that you have performed since the last evaluation:
• Please describe areas related to research and presentations in which you feel you excel:
• Please describe areas related to research and presentations in which you feel you could improve; include goals/plans on how to improve these areas:
• Faculty feedback of ECC Resident’s presentation skills and research activity:
  o Resident presentation skills 1 2 3 4 5
  o Residents preparedness for ECC rounds 1 2 3 4 5
  o Residents ability to prepare original research 1 2 3 4 5
  o Residents ability to conduct original research 1 2 3 4 5
