Intern Learning Objectives:

- Principles, design and execution of poultry field trials
- Principles of poultry herd health and management

Intern responsibilities:

- Collaborate with leading veterinarians in the poultry veterinary medicine industry
- Design and execute field trials with guidance from mentors
- Make own travel arrangements throughout the United States as needed
- Attend mid-summer entrepreneurial and technical writing seminar
- Prepare an abstract to submit for the American Association of Avian Pathologists (AAAP) annual meeting

Training:

- Study design and technical writing
- Veterinary product development, licensing and production
- Specific training directly related to the projects being conducted
- Some training sessions held in conjunction with the Swine and Bovine Veterinary Internship Programs, when applicable

Program Objectives:

- The program will present short-term, field-based learning situations for interns to gain hands-on practice in poultry production medicine
- The program will provide networking opportunities as interns work with their future colleagues/ poultry veterinarians as part of the program

Internship Opportunities:

- Network with poultry technical services veterinarians from the industry's top animal health companies
- Travel throughout the United States to interact with poultry producers and veterinarians
- Opportunity to work with other production animal medicine-interested students from various colleges of veterinary medicine
