

Dairy Veterinary Internship Program (DVIP)

General Internship Learning Objectives:

- ◆ Principles, design and execution of dairy field trials
- ◆ Principles of dairy herd health and management

General Internship Responsibilities:

- ◆ Collaborate with leading veterinarians in the dairy veterinary medicine industry
- ◆ Design and execute field trials with guidance from mentors
- ◆ Making own travel arrangements throughout the Midwest as needed
- ◆ Attending mid-summer entrepreneurial and technical writing seminar
- ◆ Preparing an abstract for American Association of Bovine Practitioners Student Case Report/ Research Presentation Competition

Training:

- ◆ Study design and technical writing
- ◆ Veterinary product development, licensing and production
- ◆ Specific training directly related to the project being conducted
- ◆ Some training sessions held in conjunction with the Swine Veterinary Internship Program, when applicable

Program Objectives:

- ◆ The program will present short-term, field-based learning situations for interns to gain hands-on practice in dairy production medicine
- ◆ The program will provide networking opportunities as interns work with their future colleagues and dairy veterinarians as part of the program

Internship Opportunities:

- ◆ Network with dairy technical services veterinarians from the industry's top animal health companies
- ◆ Chances to travel throughout the Midwest to interact with dairy producers and veterinarians
- ◆ Opportunity to work with other dairy and production animal medicine-interested students from various colleges of veterinary medicine
