Continuous improvement of the curriculum and methods of teaching in the preeminent Food Supply Veterinary Medical Program

Continuous improvement of food and fiber animal production by whole system analysis, acknowledging the interactions of diet, disease, environment, animal behavior, welfare, and humans

**OUR MISSION:**

Providing timely, full-service, high quality clinical and diagnostic services

Enhancement of human and animal health through "One Health" research and initiatives

Integration and transfer of knowledge obtained through evidence and science based research between academia, practitioners, producers, and the public to establish best practices in food animal production

**OUR MISSION:**

Leading implementation of disease control, diagnostic practices, enhanced food safety, and animal welfare programs

Leading research initiatives in food animal diseases, behavior and welfare, food safety, and risk assessment and modeling

Being globally recognized leaders in identifying and sharing solutions for effective disease control in food animal agriculture and contributions to global food security

**OUR MISSION:**

Integration and transfer of knowledge obtained through evidence and science based research between academia, practitioners, producers, and the public to establish best practices in food animal production

Providing timely, full-service, high quality clinical and diagnostic services

Enhancement of human and animal health through "One Health" research and initiatives

**OUR MISSION:**

Serving Animal Agriculture Through...

SUPPORT THE CONTINUAL IMPROVEMENT OF FOOD ANIMAL AGRICULTURE AND FOOD SUPPLY VETERINARY MEDICINE TO BENEFIT IOWA AND THE WORLD
