New Farrier Joins LVMC Staff

Mr. Jamey Carsel is our new certified journeyman farrier and brings a wealth of experience and capabilities. He has authored 10 articles in the “American Farrier Journal” and his arrival will be highlighted in an upcoming issue. Mr. Carsel is passionate about teaching and will be conducting seminars soon. If your clients are looking for quality service from an experienced expert, the LVMC is the place to come.

Coming Soon: Electronic Medical Records

Implementation of a new Electronic Medical Records (EMR) system is rapidly approaching. This new service will provide more detailed, timely and accurate information regarding your referral patients. We will let you know by e-mail or fax as soon as this new service is available. If you haven’t let us know of recent e-mail changes, please do so by calling 515-294-4900 or e-mail emills@iastate.edu.
Opening a new facility is always an exciting and interesting time and now that we are fully operational in the Lloyd Veterinary Medical Center, we are even more appreciative of what this outstanding equine and large animal facility has to offer our clients, patients, faculty and students.

The progress being made on planning our small animal hospital expansion and renovation program is creating excitement and anticipation. This is a major undertaking that will more than double the size of our current small animal hospital. As anyone who has been through facilities construction and remodeling knows, it is a challenging time. We have a strong planning team working to ensure that the facility fits your needs and those of your clients and patients with an outstanding level of service quality.

Expansion programs like this offer fabulous opportunities and we are looking forward to the coming months as we work to improve our capabilities and services to you, your clients and our students. We will keep you informed of our progress!

It is a pleasure to welcome Dr. Rodney Bagley to the college as chair of the Veterinary Clinical Sciences department. He is a neurosurgeon with outstanding credentials and a great addition. It is also a pleasure to welcome Dr. Bianca Zaffarano, a recognized expert in avian and exotic animal medicine and surgery. Dr. Mary Bergh joins us as a board-certified, small animal orthopedic surgeon as well. Mr. Jamey Carsel, Certified Journeyman Farrier, recently arrived. All bring added expertise and experience that will help us better meet your needs.

We are using this issue to introduce the faculty and clinicians who are working with you and your clients on a daily basis when they come to the Lloyd Veterinary Medical Center. We are fortunate to have an outstanding team of veterinary medical specialists as a resource and look forward to continuing to serve your needs.

We very much appreciate your support and are working hard to continue to earn your business. Please stop in to see us and let us know how we can better fit your needs. Thank you for making us part of your service program.

Sincerely,

Dr. Sally Prickett

LVMC Offers Confidence in Emergency Care!

Caring for emergency situations is critical and at the Lloyd Veterinary Medical Center your clients and their animals will receive quality care provided by people who genuinely care about their needs.

Here are some of the features you will find here:

- DVM on site 24 hours a day, seven days a week
- Five full-time registered ICU veterinary technicians, including one board certified in critical care
- Full access to complete advanced imaging technology, including MRI, Echocardiography, Ultrasonography, Digital Radiography, and CT Scanning
- Board certified radiologists to provide expert imaging interpretation
- Board certified specialists available during the day and on call as needed for emergencies
- Surgical team available for emergency surgery
- Complete laboratory services on site
- Full monitoring with centralized cardiographic displays
- Blood bank

Reminder: We have restructured your client's initial emergency visit. It will cost $75, which includes office call, physical examination and estimate of costs for any other services that might be required.

Shelter Medicine Provides Needed Skills

No matter what area of the profession you are in, at some point the question of pet overpopulation is bound to come up. Iowa State's shelter medicine program is one of the oldest in the country, founded in 2003. The program is designed to improve the health and well being of animals in shelters through the advancement of shelter medicine and shelter medicine education so these animals can be adopted as useful pets.

Students learn about overpopulation, lost and stray pets, how a shelter is run, how to practice medicine and surgery in a shelter, the need for animal control, and how veterinarians can help their communities with overpopulations.

If you are interested in learning more about our program, check, our website: www.maddiesfundisu.org, or contact Drs. Claudia Baldwin and MeLissa Ciprich-Christensen in Veterinary Clinical Sciences or Dr. Christine Petersen in Veterinary Pathology.

Name Change for Community Practice

For those of you who attended the college and rotated through Community Practice, we've changed its name. Iowa State University Small Animal Primary Care Clinic is the new name for this practice. The change better describes what goes on in this area of the Lloyd Veterinary Medical Center, especially as we head into the expansion phase of our small animal facility.
